Playgrounds that have high play value while incorporating safety, low maintenance and IPEMA certification will be given preference. Owing to these ideas, low priority will be given to bubble panels (due to high vandalism), spring riders (due to breakage), and to roofs on playground (low play value and inconsequential amount of shade versus price).
- 2.2 Scale Drawing & Descriptions.** Design shall be submitted with a scale drawing depicting the playground area and include written descriptions of the components. RFP response must include, at a minimum, three (3) renderings of different playground design perspectives.
- 2.3 Playground Areas.** There shall be one large playground space (not to exceed 85' x 100' and all of which must be wheelchair/ADA accessible) with separate areas as follows:
- (a) An area for 2-5 year olds. All support posts must have a minimum of 3.5" outside diameter.
 - (b) An area for 5-12 year olds. All support posts must have a minimum of 5" outside diameter.
 - (c) A freestanding Spinner for groups of kids of all ages; must be easy to enter from a wheelchair.
 - (d) Freestanding interactive (music) pieces for all ages.
- 2.4 Photographs of Playground Equipment.** Include photographs of playground equipment being proposed.
- 2.5 Shade Structures.** There shall be a minimum of two (2) integrated shade structures in the playground design. Structure sizes may vary depending on design. Shade structures should include installation, concrete base, and all steel posts. Shade structures need to cover part of the playground structures themselves.
- 2.6 Benches.** A minimum of two (2) benches shall be included in the playground design to be placed inside the playground borders. Park benches must match color of the playground colors.
- 2.7 Safety Surface.** All equipment is to be placed inside a bordered safety surface area that has a minimum height of 12" above the ground. If available, include one manufacturer's wheelchair-accessible border section for each area when calculating safety surface borders. Safety surface shall include:
- (a) A layer of weed barrier fabric on grade;
 - (b) A 12-inch (12") layer of IPEMA Certified Engineer Wood Fiber wood mulch safety surfacing on top of the fabric layer; and

It shall be the contractor's responsibility to properly store, secure and handle materials/equipment.
- 3.5 Removal of Trash & Debris.** Contractor shall be responsible for the removal and legal disposal of all waste, trash, and debris resulting from the work under this project. Work site shall be kept clean and orderly during construction; waste, trash and debris shall be removed from the site or adequately containerized daily.
- 3.6 Preservation of Property.** Contractor shall carry out their work with such care and by the proper methods to prevent damage to the property adjacent to the work or within streets, easement locations to the extent the owner may have rights therein, or other property of the owner or of others, whether adjacent to the work site or not, the removal, relocation, or destruction of which is not called for under this project; it being a condition of the execution of the contract that the work be performed in such a manner that the property of others and other property of the owner shall not be damaged in any way. The word "property" as used herein, is intended to include among other types of property, public streets, storm and sanitary sewer, water lines and appurtenances, or other structures. Should any property be damaged or destroyed, the contractor at their own expense shall promptly, or within reasonable time, repair or make such restoration as is practical and acceptable to the owner of the damaged or destroyed property. In case of failure on the part of contractor to repair or restore such property, or make good such damage or injury, the County may within forty-eight (48) hours notice, proceed to repair, rebuild, or otherwise restore such property as may be necessary, and the cost thereof will be deducted from any monies due or which may become due the contractor under this contract agreement. The contractor shall, at all times in performance of the work, employ approved methods and exercise reasonable care and skill so as to avoid delay, damage, injury or destruction of existing public service installations and structures; and shall at all times in the performances of the work avoid interference with, or interruption of, public utilities services, and shall cooperate fully with the owners thereof to the end.
